Automobile Smash Injures Tony DeCecco

Hold-up of Bill Kasper and Robbery of White Lunch Reported on Week-end Police Doctet.

The week-end police record is as follows: One automobile accident in which Tony DeCecco suffered a fractured skull; M. Lopichuk slightly injured; robbery at the White Lunch Cafe shortly after it opened on Sunday morning, when about \$15 was stolen; Bill Kasper, miner, employed at McGillivray mine, held up in East Coleman on Saturday night and robbed of \$9.00 and other articles about his person.

The accident in which DeCecco was injured occurred about a half mile east of Blairmore. Accompanying him were Gordon Milley, Harry Clifford, reported to have been driving when the smash occurred, and M. Lopichuk, well known hockey player. They were driving from Bellevue. Inquiries elicited the information that the car skidded and turned over in loose gravel, the top being ripped off. The motor bread wagon of Mr. Brunetti was commandeered by the police to bring in the injured men to Coleman hospital. Milley and Clifford were able to proceed home, though their nerves were shaken, and Lopichuk was discharged on Monday from hospital, his injuries being of a minor nature.

The holdup case was reported before midnight on Saturday. Kasper had been with friends down town, and proceeding homewards after the hotels had closed, was accosted near his home in East Coleman, two men telling him to stick 'em up. He was taken completely surprised, and the men went through his pockets and took everything of value, including \$9. He came back to town but could give no clue to his assailant's identity, except that they had a covering over the lower portion of their faces.

The White Lunch robbery occurred after it had been opened about 6 a.m. Only the cook was in the place at the time, and the money had been kept where apparently it was easily seen by the thief who took it, or it may have been taken by someone acquainted with the place.

American Lady Loses Her Buick Car In Yoho River

Banff—A visitor in town this morning reported to the Crag and Canyon that an American lady, paying a visit to the Takakkaw Falls yesterday afternoon, parked her new Buick car and crossed the bridge over the Yoho river to get a closer view of the high falls. She failed to set the brakes or put the car in gear. A short time after she left the car was noticed to move slowly toward the river. Her informant said that had he realized there was no one in the car he might have been able to reach it and had the doors been open to have set the brakes. However he did not realize the car lacked an attendant and made no effort in this connection. The big car moved to the bank of the river, hesitated a moment then went on into the river. The current caught the machine and carried it down, the top just missing the footbridge, and the last seen of it was careening madly down the current. The river was stated to be in flood.

Found Dead on Railroad Tuesday Morning

Circumstances Indicate George Rizko of Michel Had Fallen From Passenger Train Going West.

An employee of International mine working at the coke oven came across a gruesome sight at 5 a.m. on Tuesday when proceeding to work, coming across the body of George Rizko, 34 years, of Michel, where he had lived for nine years since coming from Poland, where his wife is living.

The body was badly mutilated, his right foot being severed, head and back badly gashed, and left leg above knee broken, besides other body injuries. It was judged that he died instantly or very shortly afterwards.

A friend of deceased stated he had seen him off at the railway station here, after spending most of the evening with him. Albert Sapeta, proprietor of Grand Union bowling alleys, stated deceased played a game during the evening, with John Osenchuk, of Coleman.

L. V. Blanchard, night agent, C.P.R., stated that Rizko purchased a ticket to Michel over half an hour before the train was due at 1.10 a.m. and asked if he might sleep in the waiting room till it arrived. He also asked to be awakened if he should be asleep. The train did not arrive till after 1.30 a.m. and Mr. Blanchard noticed that Rizko got up to go to the train, but in attending to his own duties did not see him get on.

Oliver Barringham, taxi driver, told The Journal that he saw Rizko leave the waiting room and go towards the head end of the train, but did not actually see him get on. It is presumed that having slept, he may have forgotten he had a ticket, and climbed between the tender and baggage cars, riding there till he fell off west of the International mine crossing.

Constable Antle of the town police was called and summoned the R.C.M.P., the coroner and the undertaker, and the body was subsequently removed to the undertaker's parlors. At 2 p.m. a jury viewed the remains, when the injured were pointed out by Dr. K. McLean, and the inquest adjourned till 10 a.m. this (Thursday) morning. The

Important To Water Users

Seeing that all the water used has to be pumped into the dam at a very high cost, the Council is asking for the co-operation of the water users to not use any more water than is actually necessary.

If this is not complied with the water rates will have to be raised.

In future anyone who allows the water to run indiscriminately into the street will have that service cut off.

By order of Coleman Town Council

Finest Timber In Alberta Destroyed "Ructions" in Relief Camp

Supt. Alexander Stresses Importance of Preserving Beauty of Forest Reserves.

The area in the district south of Coleman over which the fire raged has very attractive scenic charm, and has some of the finest standing timber in Alberta, stated J. P. Alexander, superintendent of Crow's Nest and Bow River Forest reserves, who was in the area during last week supervising fire fighting.

Much of the timber land was held by McLaren Lumber Co., which operated a mill between Coleman and Blairmore until a few years ago, when operations were discontinued owing to financial difficulties.

Some of the timber is 100 feet high and has a diameter of three feet. Though it is not likely that this timber would ever be cut for commercial purposes, yet its destruction will have a very bad effect on water conservation. Denuded forest areas have already made a marked difference in the water flowing from the various waterheads of the forest reserves, which not only depletes very seriously the water flowing into the lower levels and irrigations systems, but also depletes the bird and animal life of the reserves. Streams in which there was formerly good fishing are now dried up before the end of July. Burnt over forest areas contribute to this destructive effect.

Alberta residents and visitors cannot be too careful in taking precautions against outbreaks. The province has the most scenic attractions in Canada in its mountain forest reserves, each year seeing an increasing number of people coming long distances to enjoy the relaxation which the national parks and forest reserves afford.

THE SALVATION ARMY

Regular services will be held at the Salvation Army next Sunday, 10.30 a.m. Directory class. 3 p.m. Sunday school. 7.30 p.m. Salvation service, to which all are heartily welcomed. Young People's meeting every Friday at 7.30 p.m.

body was released for burial and taken to Michel by George Fisher, undertaker, of Natal, the funeral being held on Wednesday.

The jury members are B. P. McEwan, foreman; J. Kerr, Ed. Ledieu, J. S. D'Appollonia, T. Holstead and Frank Aboussafy. Constable W. R. Beyenton, is in charge of the jury and the investigation, under Coroner Alex. M. Morris.

FIRE DESTRUCTION LEVIES TOLL LASTING FOR YEARS

Irrigation, Animal and Bird Life, Angling Streams and Grazing Pastures Suffer Through Carelessness

The country through which fire has been raging since Aug. 23 is about 26 miles south of Coleman, a beautifully wooded tract of land in which are all the beauties of mountain, forest and stream, sloping away into park-like ranch and farm land in which there are grazing at least 1700 head of cattle of the Pincher Creek Live Stock Association.

On Tuesday, when the writer was out at Castlemount fire camp, he met Pete LaGrandeur, veteran rider and judge of Calgary and other stampedes, and L. C. Bonertz, a grizzled veteran of the cattle country, who were superintending the rounding up of the cattle to clear them out of the danger zone.

Castlemount ranger station, of which Joe Kovach is in charge, and who was in charge of the 43 men who were cut off from Friday till Sunday morning, was and still is in danger, as the fire had swept onwards leaving the station between two fire fronts. There is danger of the fire spreading northward towards the Pass, and already it is reported to have spread southward and connected with the area in Castle River district burnt over two years ago. Superintendent J. P. Alexander, in charge of Crow's Nest and Bow River forest reserves, has been on the job, and Ranger Boulton of Coleman has made daily trips into the fire area, his special concern being to guard as far as possible against the fire coming into this immediate area.

Men have been working from as early as 3 a.m. till 10 p.m. trying to stem the fiery advance, but high winds every day have made it extremely difficult to effectively check it; night patrols are also made. It has advanced about 18 miles from the inter-provincial boundary, with a frontage of over 25 miles. Rain will be the only effective stoppage, though about 150 men are continually employed and so far no buildings have been destroyed.

Relief was felt when 43 men cut off last Friday at the inter-provincial boundary under Ranger Kovach started back to Castlemount ranger station, leaving the summit at 10 a.m. and arriving about 4 a.m. with their tools and blankets, after burying their cooking utensils and fire pump, to be picked up later by pack-horses. They walked about 17 miles, according to Ranger Kovach. On Saturday an airplane was sent down from Calgary to try and locate them, but the dense smoke prevented them being sighted, and the men did not see the plane. They had an arduous time coming out, and were a tough-looking company when they arrived unheralded at the camp. A hearty meal and a sound sleep restored them to their usual good spirits and the majority are staying on the job. Some had to give up on account of exhaustion or not being sufficiently well equipped with stout boots and clothing. It speaks

Fire Destruction

(Continued From Page One)
well for them that they endured
the hard work cheerfully.

Charlie Robinson, well known
around Coleman, is an experi-
enced camp cook, and the writer
enjoyed a good meal at the camp,
which included beef stew, pota-
toes, smoked sausage, rice pud-
ding and plenty of trimmings,
so that the men are well fed, for
fire-fighting develops voracious
appetites. The men are paid 15c
per hour, and pumpmen, cooks
and crew bosses are paid on a
graduated scale. Provisioning
is an important job, for there is
no corner grocery to run around
to, and woe betide the cook if
the camp runs short of grub.
The rangers see that ample sup-
plies are sent to the camps every
day. Fred Green of Blairmore,
veteran of many fires, is one of
the crew bosses. Foss Boulton
of Coleman, is one of the time-
keepers, and Bert Stephenson
was on for a few days, but had
to come out through sickness.
On Tuesday about 150 men were
employed.

NOTES AND COMMENTS

HEAVY FIRE LOSSES every year in Alberta's forest reserves are in most instances traced to human carelessness. In this immediate area most of the damage for years past has been caused by fires spreading from British Columbia, entailing not only heavy timber losses, but heavy expenditure in combating the fires. The loss is irreparable; mountain scenery is spoiled and wild life suffers. Water-courses dry up much more quickly when the trees are burned off, and this season the drought has added to the already hazardous period in safeguarding the forests. It cannot be impressed too strongly on everyone the utmost care which is necessary to prevent forest fires.

LAST WEEK 49 single unemployed men were sent to Summit relief camp, Crows Nest Lake, by the provincial authorities, the arrangement being they were to receive two meals daily, blankets and huts to live in. They were not to receive any pay, apparently being left to kill time as best they could. Shortly after arrival they commenced to smash up camp furniture and windows, and their excuse for doing so it is reported was that no tobacco was issued. They were herded out of camp by police, and hustled off to whence they came the best way they could find.

IT WAS foolish to isolate unemployed men in such an out-of-the-way place, no matter how well-intentioned the relief authorities may have been. But on the other hand, such action of the men alienates public sympathy, for after all the taxpayer has to work hard enough to provide for unemployed without having to also pay for vicious destruction of property.

MANY ARE asking themselves, is too much paternalism being shown unemployed men? The well meaning man will take almost any work that offers till he can secure something better. But all too many boast that the world owes them a living, a wrong concept of life entirely, which has been encouraged by thoughtless and irresponsible people. The only remedy apparently is to shift out the worthless and put them in a place where they will have to work to earn their keep. Then they will realize that instead of the world owing them a living, they will have to utilize what little brains and energy they possess to survive.

THERE IS not a man worth his salt who has not overcome difficulties and in later life appreciates the fact. The quitter always blames everybody but himself.

"HATS OFF to the Taxpayer," states the Gananouque (Ont.) Reporter, and makes the following comment: "Some one should start a movement to build a monument to the average taxpayer. He is the man who keeps the home fires burning and makes the wheels of government go round. He has gotten himself into the position of taxpayer by thrift, by spending less than he makes, by investing in the home town. To do it he has denied himself pleasures and luxuries that the spendthrift had in plenty. In every community he is abused and referred to slightly on many occasions, but in good years and bad years he is the backbone of the country and without him there would be no government and no relief. He carries the burden that others shirk, many times without complaint, which he would often be justified in voicing. He is deserving of a monument, a tall enduring monument, for he, like Atlas of old, bears the world upon his shoulders."

THE JOURNAL acknowledges the courteous help of Ranger Harry Boulton in obtaining authentic information of the disastrous forest fires and visits to the various camps and ranger stations. The daily press of the cities depend on local correspondents for up-to-the-minute developments to keep the public informed, besides which the readers of The Journal expect to get first-hand reports. All are anxiously concerned over the extensive damage resulting from these fires, and an average of a thousand words a day has been despatched to various dailies and the Canadian Press.

LEST there be some who labor under the impression that we do not need money to carry on our business, let us remind them that despite all the good wishes and otherwise that may be heaped upon us, there is a sizable wage bill to be paid each week and that requires cash, besides which many other expenses enter in the production of a worth-while newspaper. So, if you are one of our debtors, kindly step along or mail the amount due. Business is business; if you settle your bills, we can promptly settle ours. Where there's a will, there's a way!

WHEN you see one who is brutal to his inferiors you can be sure you are looking at one who is a coward in the presence of his equals or superiors. Loud mouthed violence emanates from a yellow streak three inches wide each side of the vertebrae.

Hospital Notes

Patients visited in hospital this week include Erminio Orofo, who is suffering from acute asthma; Dan H. Costa, suffering from internal trouble; Herb Snowdon, who is nicely progressing from recent injuries; Mr. Kulig, and Mr. John Hopkins. Mrs. Blower, Mrs. William Graham and Mrs. John Kinnear are also patients. William Bell left hospital on Monday, and Tony DeCecco is making progress.

There is not a business but which can be helped by the use of advertising and printed matter. The man who is alive to opportunities and the advantages of rightly placed publicity does not have to be told—he already knows.

When the last iconoclast has smashed down the last wall of faith that humanity has struggled and sacrificed

Local News

Henry Tiberghen left for Calgary on Tuesday where he is attending the Elks' convention.

Mr. and Mrs. S. B. Ryan are spending their vacation at the coast.

Mr. and Mrs. Wilfrid Dutil accompanied by Mrs. A. Dutil, motored to Kalaspel, Montana, for the week-end.

The Grand Union beer parlor has been made resplendent with a new interior decoration, the work of Andy Thurber, and it is a very good job.

It is estimated 200 cars lined the banks of the lake on Friday evening as many Pass sport fans gathered to watch Charlotte Acres in a fifteen minute exhibition of swimming strokes. A good crowd also watched her on Saturday evening.

R. Darke of Calgary is relieving in the local branch of the Canadian Bank of Commerce while F. G. Creegan and W. L. Rippon are on holidays. Mr. Creegan will spend part of the time visiting at Lomond, Alta., and on completion of his two weeks holiday Mr. Rippon will take three weeks holidays.

The broadcast of the Vimy war memorial dedication on Sunday did not come in very clearly, and at times it appeared that two speakers were giving addresses at the same time. Another interference which at times almost drowned out the speakers was the roaring of airplanes which were circling over the vast assembly while the ceremony was in progress. Those who arose early to hear it on short wave sets were keenly disappointed, and the reproduction on Sunday afternoon at 5 p.m. did not give any better results. It was a pity that such an important and significant event was not favored with better broadcasting conditions.

Miss T. E. Meeres, inspector from the Bureau of Labor of the provincial government, was in the Pass towns last week, inspecting the stores and other places where people are employed, to find if the provisions of the minimum wage act are complied with. This is Miss Meeres last visit, in fact it was her first too, no inspector having been around here for years. But Miss Meeres is to be married very shortly, and will live in Ottawa. She was connected for some time with the Edmonton Journal, and made a trip to England as a representative of that paper, where she met the late Rudyard Kipling, the late G. K. Chesterton and other noted writers.

Avoid Wasting Water

Citizens are reminded that water wastage will increase pumping costs, which has an effect on the cost of the service to every consumer. Even though lawns and gardens require more water than in a wet season, yet it is advisable to avoid absolute waste by allowing water to run unnecessarily. Avoidable waste has been noted in quite a number of instances, and even though the water in the rivers is free, it must not be overlooked that it costs money to convey it to the houses by means of pumping. The use of a half inch hose for 24 hours will take more water than would be ordinarily used for general household purposes in three months. People objected when a hose rate of \$5.00 per season was collected, yet by wasting water they are paying the way for this rate to be again charged. People must co-operate with the council if they wish to obtain lower water rates.

McGillivray Co. Broadcasts

McGillivray Creek Coal and Coke Co. Ltd. is sponsoring weekly broadcasts over CFCN at 9 p.m. Fridays, consisting of spirited and martial band selections. Many heard the broadcast on Friday, which proved quite interesting, and it will help to make known the many improvements which the company has made to its plant to serve its wide range of customers with a very superior grade of coal for industrial purposes.

Made 5,400 Mile Trip By Auto

Mr. W. G. Moffatt, music teacher in the Pass schools, returned on Monday from a trip which took him south to Agua Caliente in Mexico, visiting many important places en route. The big bridge now under construction at San Francisco is one of the most stupendous engineering feats ever achieved, and is of great interest to visitors. The entire trip was made without even a flat tire or other car trouble, despite the extremely hot weather. He left here on July 1 and returned on July 26.

Tennis Stars at Edmonton and Lethbridge

Dick Shone salvaged one event for Coleman at the provincial tennis tournament last week when he won the Country Special, an event open to all players from country points. Dick reports that the courts left much to be desired especially when a provincial tournament had to be played on them.

Coleman club sent its strongest delegation to Lethbridge today to compete in the southern Alberta tennis tournament, those competing are Shone, Jenkins, Balloch and Routhead. Calgary is sending down a strong delegation including Bill Stark, provincial champion, and it is expected that the finals will see Coleman oppose Calgary. Several tennis players have voiced their intention of motorizing to Lethbridge on Saturday to see the finals.

Then The Donkey Bucked

Though one is only a short distance from the ground when riding a donkey, and a man with extra long legs like Editor Bartlett might be able to keep his feet on the ground, it was not so with Walter Bobbitt, whose round body and short legs do not fit well on a donkey. But like Steve Brody, who dived off Brooklyn bridge, he took a chance in the donkey baseball game, and though Walter may have been a perfect example as a sergeant of infantry, he does not shine so well when it comes to mounting a donkey. The donkey apparently sensed it too, for he gave Walter such a bounce that he came down on the ground with sufficient force to crack a few ribs,

and he has been under the solicitous care of his medical advisors. Many friends regret to learn of Walter's disability, but admire his adventurous spirit, even though it is poor consolation for the excruciating pain suffered from cracked rib and a badly contused rear-end.

LOCAL AND GENERAL

The Italian Society members enjoyed a picnic on the banks of the Old Man River, near Sentinel crossing, on Sunday.

Mrs. A. Walker left Wednesday morning for South Wellington, Vancouver Island, where she will spend her vacation.

The Ado-Rako club honored one of its members, Miss Rose Claes, at a shower on Tuesday evening in the Catholic hall. The bride-elect was the recipient of many beautiful gifts from her friends present. After a delightful lunch had been served whilst was played, the prize winners being Mrs. H. Claes and Maureen Cooke.

Mr. and Mrs. H. G. Charman and children and Mr. and Mrs. Jones and young son, returned on Wednesday to Calgary after spending a few weeks at Crows Nest Lake.

SUNDRY ITEMS AT

JOURNAL OFFICE

Bond Typewriter Paper, 8 1/2 x 11, Letter size, in box of 500 — \$1.35

Receipt Books with blank Duplicates and carbon — 15c, 30c, 55c
Ruled Statement Forms, pad — 15c
Ruled Invoice Pads, for sending out accounts, pad — 25c

"Ladies Wear Store"

Main Street, Coleman

The People Are The Jury

Every business and professional man in Coleman is on trial for the life of his business or practice.

Many members of the jury are favorable to everyone here.

But the whole jury needs to be convinced.

Did you ever stop and do a little figuring on the spending power of the Coleman trading area. Try it sometime. Then figure what your proportionate share might be.

Ask yourself "Am I getting my share of the business that should be being done here?"

Those who do advertise regularly are helping to convince the jury to act favorable toward all doing business or practicing in Coleman.

Are you taking full advantage of your opportunity to present favorable evidence to the jury?

WORLD HAPPENINGS BRIEFLY TOLD

Jewish newspapers have been ordered not to report anything about the activities of Jews on Olympic teams.

Exhibits from King Edward and the National Gallery were included in an exhibition of British art at Amsterdam.

The Duke of York was elected president of Christ's hospital recently, receiving the ancient "charge" of faithfulness and diligence which originated in 1557.

The Harvard University observatory reported recently two comets were visible to the naked eye in the evening sky. An observatory bulletin termed the phenomenon "an extremely rare occurrence."

It has been announced that the Beit fellowship for scientific research, tenable at the Imperial College of Science for 1936-37, has been awarded to E. K. Woodford of the University of Alberta.

At the end of 1935 South Africa, whose white population has not yet touched the two million mark, had 212,767 motor cars and taxis. This is an increase of 15.29 per cent. in 1934, when the number was 184,555.

Drouth has played havoc with wheat and vegetable crops in Ontario, Manitoba and, to a lesser extent, Quebec, the Dominion bureau of statistics announced in a monthly crop report.

J. A. W. Lemon, 62, one of the men who introduced polo to western Canada, is dead. He was born at Guelph, Ont., and came west when 16 years of age to join a financial firm with which he remained until his death.

Canadian railways are keeping step with mechanical developments such as trucks, buses and airplanes. Sir Edward Beatty, president of the Canadian Pacific Railway, said on his arrival at Saint John, N.B., on an inspection tour.

Radio Helps Fishermen

Points Out Presence Of Shoals To British Trawlers

Radio is now helping to catch fish.

Masters of more than 1,000 British trawlers can detect the presence of shoals by watching a small luminous spot travel over a graduated scale. The instrument was previously designed to provide continuous sound, but fishermen have found it also indicates the presence of fish.

Fitted to the hull of the ship is a special device which projects a radio wave toward the bottom of the sea. When they strike the bottom they are reflected back to the ship and cause a moving spot of light to jump suddenly. This movement indicates the depth of the water at that instant.

If a shoal of fish is passing under the ship, a second movement of the light spot will indicate its presence and, what is extremely important to its depth.

Planning Girl Engine Crew

Russian Woman Engineer Selecting Members From Best Mechanics

Twenty-three-year-old Zinaida Trotskaya, Russia's first and only woman locomotive engineer, has announced that she intends to train an engine crew of women in the near future. "Since I am the only woman now working on a locomotive I have decided to select members for this brigade from the best girl mechanics," she added. The announcement was made just after she had been informed that the Government had awarded her the Order of Lenin, its highest honor, for exemplary work at the throttle of the Z-104, one of the Kazan's most powerful locomotives. Zinaida lives in Moscow. Her mother is a time-keeper in a locomotive depot, and her father was a railway clerk. At the time of his death she became apprenticed as a locomotive mechanic, then worked her way up as engineer.

Photographed From Air
King Solomon's Mines are being photographed from the air. Some 300 miles of "gold belt" in the Gwanda-Belwinge area of Southern Rhodesia are being "shot" in this way for the director of geological survey, 5,000 photographs being taken.

High Quality Coal In Arctic

An expedition prospecting mineral resources of the Pechora region, on the banks of the river Vorkuta, north of the Ural mountains and beyond the polar circle has discovered high quality coal deposits in thick layers.

There's no pleasure in being exclusive if nobody else wants in.

Advance In Television

Expected To Be Offered To The Public By Next Year

Television seems certain to come out of its hiding place this summer. A large-scale experimental broadcasting station is being constructed on top of the Empire State building in New York city, and official announcements from the Radio Corporation of America say that it will be ready for operation within a few months. R.C.A.'s chief rival, Farnsworth Television, whose system has been adopted for trial by the British and German governments and is now undergoing test constructions in those countries, is also showing great activity at its headquarters in Philadelphia. Both these systems employ the electrical-scanning principle, which practically renders obsolete all previous mechanical-scanning systems.

The Federal Communications Commission is now holding a series of hearings to establish uniform standards so that a given television receiving set will operate interchangeably on either R.C.A. or Farnsworth sending signal. Unlike sound broadcasting, in television any change in procedure will render useless existing receiving sets, so that any setting up of standards immediately "freezes" development of both sending and receiving while the standards remain in force.

This is but one of the almost infinitely complicated technical problems that face television. Scientists agree that the development of television will be vastly slower than the development of sound broadcasting. So far, plans call for the distribution of only a limited number of receiving sets, to be given out by the television companies largely for their own staffs and used for experimental purposes.

Television possibly will be offered to the general public next year. The size of the image developed for home receiving sets thus far is ten by fourteen inches.—New Republic, New York.

Wrigley's Inaugurate Pension Plan

Company Contributes Nearly \$108,000 To Start Plan For Employees

Over two hundred members of the Wm. Wrigley Jr. Co. Limited of Canada join with 3,000 employees of the company in the United States in a pension plan recently announced. The plan went into effect in Canada on July 1st, 1936.

Under the plan the amount of pension depends on the workers' wages and the length of service with the Wrigley Company. Wrigley's have always been interested in the welfare and security of their employees and have always manifested interest in the welfare of the company.

In order to credit employees who have been with the company for twenty years or more, the plan provides that the company will contribute to the fund of almost \$100,000 per month for the previous service. Thus any employee who has been with the Wrigley Company for twenty years and whose salary is now \$200 a month would have an automatic pension of \$50.00 per month.

On the average, the company and the employees pay into the fund an equal amount each month. The employees' contribution amounts to about four cents on every dollar earned. The retirement age is set at 65 years. Life expectancy is estimated at 12 years after age 65. However, in the event of death, or discontinuance in the employment of the Wrigley Company, or in the case of early retirement, employees may withdraw the funds which they have paid into the plan, plus interest compounded at 8% annually. Payments and pensions are based on a percentage of wage multiplied by the number of years with the company.

As an example for employees long with the company, a man who has now been with Wrigley for 25 years, earning a salary of \$200 monthly, would, if he continues with the company for twenty more years, earn a pension of \$100.00 per month. And if he lives out the normal expectancy of 12 years, he will have withdrawn a total of \$12,000.00, although his contributions would amount to only \$1,200.00.

That the Wrigley Company is acting in perfect good faith is evidenced by the tremendous amount of cash contributed to the fund in order to ensure fair treatment to old employees. Fully aware of the moral responsibility of the employer to life long employees, Wrigley's have assumed this responsibility realizing that the welfare of the employee is as important to corporations as it is to individuals.

And So On

"Well, dear," said Mr. Blair after tea had been cleared away, "what are you planning to do tonight?"

Mrs. Blair shrugged her shoulders.

"Nothing special," she replied. "I'll probably write a letter or two, read, listen to the radio, and so on."

"I see," he replied. "When you come to the so on, don't forget my shirt buttons."

The man who always says, "I run things at home," usually refers to the lawnmower, the mangle and the errands.

New War Weapon

Britain Has Devised Anti-Aircraft Gun With Eight Barrels

The British have devised an anti-aircraft gun, with eight barrels, which can fire 1,000 shells a minute four miles high. It throws explosive shells, incendiary shells, tracer bullets and shrapnel. With this, it is claimed, a barrage can be set up in the sky through which planes cannot pass. But there are many considerations. Shells must explode at the right height, they must explode in the right place, and it takes some moments for a shell to rise, the wind must be allowed for, and the plane is a moving object, which can rise higher, or drop lower, change direction at will, and is a difficult target to handle. The assurance in this case may rest on the fact of the gun being able to throw such a stream of shells into the air, that, although different from a few scattered shots, the plane is unable to judge which way to turn for escape, and falls a victim to the gunner. Whatever the success of this new arm, there is to be said, that it is infinitely superior to the old anti-aircraft gun, and is an instrument of defence.

Goes To Italy

First U.S. Minister To Canada Selected To Go To Home

William Phillips, United States under-secretary of state, has been selected as the new ambassador to Rome by his country. Mr. Phillips was the first United States minister to Canada.

Mr. Phillips will face two distinct problems in his new appointment, it is said in diplomatic circles. First, and most direct, is the course of Italo-American relations complicated by the inability of the United States to recognize the Italian conquest of Ethiopia. Considerable tension for some time to come is expected.

Of indirect, but far greater importance, it is said however, is the problem of analyzing Italy's probable future course of action in keeping the United States fully informed. For remote as Italy may seem from the United States, what course she pursues in Europe has a vital effect on affairs in the Far East, where the United States is directly concerned.

Some Cities Show Increase

But Building Permits Lower Than Same Period Last Year

Value of building permits in 68 Canadian cities was more than 10 per cent. higher last June than in June, 1935, the Dominion bureau of statistics reported recently. The value was \$4,580,740, up \$414,902 from the previous week but \$524,115 below the level of June a year before.

The bureau said the value of the building authorized in the first six months of this year was \$17,500,420, considerably lower than the \$24,640,511 reported in the period January-June, 1935.

Among cities reporting improvement over May, 1936 and June, 1935, were: Regina, Saskatoon, Edmonton, Lethbridge, Nanaimo, West-Newton and North Vancouver.

The double-barrel shotgun was invented by Guilianno Bosai, of Rome, in 1616. The barrels were placed one above the other in his device.

Take This Tip—Make A Smart Knit!

PATTERN 5655

Take a timely tip now, and knit this blouse that you'll wear throughout the year! You'll love the neckline, and the subtle yoke, so prettily set off by plain stockinette stitch, and are sure to adore the sleek, snug fit of ribbing 'cross the hips. Rib stitch also bands the simple sleeves. Knit it of pastel string, or yarn, in one of the vibrant and new Fall shades. Pattern 5655 you will find instructions for making the blouse and skirt in size 16-18 and 38-40; an illustration of the house and of all stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

SUNDAY SCHOOL LESSON

AUGUST 2

PHILIP'S MISSIONARY LABORS

Golden text: They therefore that were scattered abroad went about preaching the word. Acts 8:4.

Lesson: Acts 8:5-40. Devotional reading: Matthew 13:36-9.

Explanations And Comments

The First African Convert, Acts 8:25-40. In the midst of his labors in Samaria, Philip was suddenly called to leave that field and go South on the road that led from Jerusalem to Gaza. Our text says that an angel of the Lord gave him this commission, but this does not tell us who was the chosen messenger by whom a dream, a heavenly agent, some natural circumstance or instrument, all these are in Holy Scripture, and in contemporary literature styled God's angels or messengers.

Philip obeyed the divine commission, and met a man of great authority, the treasurer of Candace, queen of the Ethiopians, who was returning from Jerusalem where he had been to worship.

The Ethiopian was reading aloud, as was the way with oriental rulers. Philip approached his chariot and said to him, "Understandest thou what thou art reading?"

"How can I except some one guide me?" was the Ethiopian's answer to Philip's question, and he invited Philip to enter his chariot and sit with him. The passage which he was reading was Isaiah 53:7 and 8, and he asked, "Of whom speaketh the prophet thus?"

And Philip opened his mouth (this is a Hebrew expression indicating that the words uttered were not his own, but those of the Holy Spirit, and beginning from this Scripture, preached unto him Jesus).

The Ethiopian asked to be baptized when they reached a pool, and Philip and the Ethiopian went on his way rejoicing.

Philip went on to Azotus and then to Caesarea. As he passed through after village he preached everywhere that "This Jesus is the Christ." Twenty years later Paul came to Caesarea and received a hearty welcome at Philip's house when Philip himself and his four daughters who were active church workers there.

Civic Employment Bureau

South African City Supplies Native Help When Needed

The City of Johannesburg, South Africa, has announced that it can supply native war-horsemen and janitors to those who seek such help. At its Native Women's Hostel 120 native women now live and earn their living by doing laundry work or going to homes to do washing or housecleaning. To help them in their laundry enterprise the city has installed electric irons and a telephone.

Anything For Style

A young farm hand visited London to spend a holiday with a relative.

His clothing being decidedly rustic in appearance, his host suggested that he should get a suit from a city tailor, to which the young man agreed.

"What about a small deposit, sir?" asked the tailor, when measurements had been taken.

"Just as you like," replied the farmer; "but one in if they're fashionable."

A pair of shoes with feet in them used as a paper weight will, in time, ruin any business. Just bear in mind that you can't leave footprints on the sands of time sitting down.

Household Arts by Alice Brooks

Powerful Underground Radio Station Being Built In Germany

An underground radio broadcast station, only one of its kind and second most powerful in Europe, will be ready for use in Germany by 1937.

Strict secrecy veils the construction of this subterranean transmitter, which will replace the present Deutschlandsender. It is located northeast of Leipzig, near Torgau on the Elbe.

Invisible from the ground and with a transmitting power of 300 kilowatts, the station can be turned overnight into a tremendously useful transmitter as capable of keeping Germany in touch with the outside world in spite of any contrary outside efforts.

It is assumed that underground aeriels will be used, with which the German army experimented extensively during the war.

No woman should indulge in gossip while she is young enough to enjoy other things.

Ultra-violet ray photography is said to record chemically obliterated writing.

One must speculate to accumulate, but it is difficult these days to accumulate enough to speculate,

Field Of Regulation Limited

Extract From Address By Minister Of Public Works And Highways Of Ontario, Before A Meeting Of Ontario Motor League

"It is hard to conceive that from the safety point of view we can approach much nearer perfection in public control by statute and regulation. This field is positively limited. Human relations can only be slightly affected by public control. Sometimes I feel ashamed of the number of regulations we have, and I can tell you there is no more unpleasant part of my duties than the enforcement of them. The public, who have clamoured for enactment, invariably resent their enforcement. There is no doubt this item contributing to public safety is of very limited effectiveness.

"The main and principal factor is good manners, and we seem to be extremely well-mannered people. Added to this is the fact that a man may be a mild, inoffensive little fellow at home, soundly hen-pecked, with his sides well galled by the harness of domestic discipline. He creeps from his door in the morning, enters his car, surrounds himself with the beauty and luxury of modern coachwork, and immediately he becomes an emperor—that is, if his wife is not with him—and from that time onward, at least while he is in the car, he is continually making a nuisance of himself all day, until he arrives home in the evening, disembarks and becomes a normal person again. I want to say emphatically that that man is not the responsibility of my department. I have no control over manners in a motor car. That is the person the public has to deal with. His bad manners cause many accidents which are outside of law and regulation. He is not the problem of this department, and we must all of you frankly that we do not take any responsibility for him."

Japan's Cheap Textiles

Are Made Possible By Child Workers Receiving Small Pay

It is common knowledge that Japan is able to underbid the rest of the world in many things, especially in textiles, and an article in the Chicago Daily News by its correspondent in Japan, Frank Smothers, who recently toured a textile factory in Osaka, gives the reason.

Mr. Smothers walked through with the manager, seeing many hundreds of children, boys and girls, at work on what is supposed to be a modern institution. As they walked along each child and woman paused to bow sheepishly toward the boss. These children are taken from poor homes, mostly from small farms, and are indentured to the company for one year, the contract being renewable from time to time. This may be a valid reason, according to Japanese ideas, for hiring these child workers and keeping them under the dormitory system—they are seldom allowed outside the factory except for an occasional visit home—but even by comparison of men's wages which average about \$18 a month—their pay is low. The dormitory children average about two and a half to three cents a day, plus their board.

The wages of adult women are about six cents a day, including food. As more than 80 per cent. of the labor in textile factories is female, it can readily be seen why Japan can underbid the world in this industry.—St. Thomas Times-Journal.

Valuable Military Asset

Powerful Underground Radio Station Being Built In Germany

An underground radio broadcast station, only one of its kind and second most powerful in Europe, will be ready for use in Germany by 1937.

Strict secrecy veils the construction of this subterranean transmitter, which will replace the present Deutschlandsender. It is located northeast of Leipzig, near Torgau on the Elbe.

Invisible from the ground and with a transmitting power of 300 kilowatts, the station can be turned overnight into a tremendously useful transmitter as capable of keeping Germany in touch with the outside world in spite of any contrary outside efforts.

Railway Centenary

Celebrations In Montreal Mark 100 Years Of Operation

Canadian railways must keep step with mechanical developments like trucks, buses and aeroplanes or "become a gradually lessening influence in a field which for many years was peculiarly their own," Hon. C. D. Howe, minister of transport warned. The transport minister joined with Premier Mackenzie King in congratulating the railways of Canada in completing 100 years of operations. These messages were directed to celebrations in Montreal, marking the centenary of the first railway in Canada, which operated between La Prairie and St. Johns, Quebec.

On the occasion of the 100th anniversary of the establishment in Canada of transport by rail, the prime minister's message read: "I desire to extend heartfelt congratulations to the officials and men of the Canadian National Railways, within whose system is included the original line over which the first train in Canada made its journey, and my cordial greetings to all who are engaged in providing for the community safe and efficient railway service. During the century which has elapsed since the first train operated between La Prairie and St. Johns' the steam railway has played an essential and all important part both in the formation and in the development of our Dominion.

"I should like to avail myself of this centenary occasion to convey to the Canadian National and to the railways of Canada as a whole my best wishes for continued opportunities of national service and for their prosperity in the years that lie ahead."

The transport minister traced the development of railways in Canada from the 16 miles between La Prairie and St. Johns' now part of the Canadian National system, 100 years ago to 42,000 miles today.

Speeding Up Photos

Mobile Darkroom Aids Scotland Yard Experts In Tracing Clews

Scotland Yard's expert cameramen, who nowadays take numerous photographs at the scene of every big crime in the Metropolitan area, are looking forward to the delivery shortly of their new mobile darkroom.

The introduction of this vehicle—literally a laboratory on wheels—promises to speed up the time in the early stages of crime detection. At present photographers are rushed to the scene of a crime as quickly as possible, but their plates have to be brought back to Scotland Yard for developing. At times the pictures prove unsatisfactory and more have to be taken—often when on-the-spot conditions have changed considerably.

Photographers using the new van, moreover, will not only save time, but also achieve better results.

In addition to the dark room, with its tanks and other developing apparatus, the van will also house a finger-print compartment, in which experts will be able to examine finger-prints as soon as they are found and determine without delay whether they are of value.

The vehicle is being given an extra strong chassis to fit it for travel over rough ground, while a special springing system will enable the photographer to expert to work while the van is in motion.

Germany's Latest Novelty

Glass Train Offers Passengers Good View Of Scenery

A "glass" train is the latest novelty for travellers on German railways. The upper part of the train is almost entirely of glass and offers passengers an uninterrupted view of the surrounding scenery. In the hilly and mountainous country the improvement is especially attractive. It will be put into regular service for special excursions from Munich to a different destination each day. The "Glass Train" is the third important break-away from conventional train design that German engineers have made recently—two other types being stream-lined locomotives and double-decker carriages.

"I do a great deal of my thinking while playing golf," says a germymann. And only the fact that he is a clergyman prevents him from putting his thoughts into words.

Hellogabalus, Roman emperor, gave dinners that required extensive travelling by the guests. The diners had to go to a different part of the city for each course.

"My great trouble is insomnia." "Er—somewhere in Central Europe, isn't it? Mine's staying in Toronto with her mother."

Iron the Easy Way
Wm. Coleman
 SELLING IRON

Why You Should Have It

1. Covers only 1/2 of an hour to use
2. Shines instantly
3. Heats in a few minutes
4. Quickly ready for use
5. Maintains even heat
6. Heats at the point of use
7. Irons like new
8. Saves 1/2 ironing time
9. No fire to build
10. No ash to carry

Price as low as \$5.95! How can you have such comfort in any part of the home? Buy a small ironing board, a small iron, and a small tin of Coleman's Ironing Cream. Ask your dealer or write to Mr. Wm. Coleman, 100-101, 102-103, 104-105, 106-107, 108-109, 110-111, 112-113, 114-115, 116-117, 118-119, 120-121, 122-123, 124-125, 126-127, 128-129, 130-131, 132-133, 134-135, 136-137, 138-139, 140-141, 142-143, 144-145, 146-147, 148-149, 150-151, 152-153, 154-155, 156-157, 158-159, 160-161, 162-163, 164-165, 166-167, 168-169, 170-171, 172-173, 174-175, 176-177, 178-179, 180-181, 182-183, 184-185, 186-187, 188-189, 190-191, 192-193, 194-195, 196-197, 198-199, 200-201, 202-203, 204-205, 206-207, 208-209, 210-211, 212-213, 214-215, 216-217, 218-219, 220-221, 222-223, 224-225, 226-227, 228-229, 230-231, 232-233, 234-235, 236-237, 238-239, 240-241, 242-243, 244-245, 246-247, 248-249, 250-251, 252-253, 254-255, 256-257, 258-259, 260-261, 262-263, 264-265, 266-267, 268-269, 270-271, 272-273, Local News

E. O. Duke, M.L.A. is visiting in the Pass towns to-day.

M. Biela of Calgary, and his daughter, Mrs. Ross, were visitors here over the week-end.

Buy typewriter ribbons for Standard and Portable Remingtons at The Journal office.

Audrey Halliwell of The Journal office staff is spending two weeks with friends at Estevan and Carleton Place, Saskatchewan.

Mrs. N.D. Smith of Lethbridge, is the guest this week of her parents, Mr. and Mrs. Jack Derbyshire.

Mrs. Geo. W.R. LeRoy of Ymir, B. C., is here this week visiting her parents, Mr. and Mrs. H. T. Halliwell.

Mrs. George McNab of Lethbridge is visiting her daughter and son-in-law, Mr. and Mrs. Wyndham Jones for a few days.

Mr. and Mrs. Sam Moores and Mr. and Mrs. Wm. White left to-day for a month's vacation at Vancouver and Victoria.

Mrs. Bowling, formerly of Coleman, now living in Edmonton, is the guest of Mrs. I. P. Neilsen this week, and visiting former friends in town.

Constable Foster, R. C. M. P. has returned to duty after an enjoyable month's holiday at Bellingham, Wenatchee, Wash., and Vancouver.

Mrs. J. A. Price returned on Sunday from the coast where she has been spending a vacation with her daughter, Mrs. Arthur Graham.

The Misses Mary and Pauline Hendrick of Lethbridge, who have been the guests of Mr. and Mrs. J. Krywolt for the past week, returned to their home over the week-end.

Mr. and Mrs. J. A. McDonald and family left on Sunday for two weeks holiday at Coeur d'Alene, Idaho, which summer resort is visited each year by quite a number of Coleman people.

A long string of passenger coaches returned "dead-head" through here on Monday from the annual picnic of the Consolidated Mining & Smelting Co. employees at Trail and Kimberley.

Mr. and Mrs. Lorenzo Richards, sr., announce the engagement of their only daughter, Eileen, to Ross Foster, third son of Mrs. Mary Foster and the late Kenneth Foster of Coleman. The wedding will take place Sept. 12.

The council on Tuesday discussed policing of the town, dealt with owners of cows in West Coleman, telling them they must conform to the provincial health laws, and sundry other matters, including wastage of water and its probable effect on the rates.

Miss O'Connell of Brant, Alta., is relieving in the post-office during the next three weeks. Postmaster Graham will leave next week on a tour to California, and will be away about two weeks. Miss Margery Halliwell will return from holidays at Coeur d'Alene to-day.

Mr. and Mrs. James Fairhurst and daughter Miss Hilda returned on Saturday from three weeks holiday in Vancouver and Victoria, after enjoying the varied attractions which are this year featuring the Jubilee celebration of the coast city. They also enjoyed a visit with Mr. Fairhurst's sister, whom he had not seen for quite a number of years.

Mrs. J. Emmerson arrived home on Wednesday morning after nearly five months visit with relatives in England. The weather there was a direct contrast to what has been experienced throughout Canada, she stated, it being cool with plenty of rain. She visited London, Liverpool, Harrogate, and other centres, and made the east and west-bound trips on the C. P. R. liner "Duchess of York," having a pleasant passage both ways.

Accidental Death, No Blame Attached

The adjourned inquest on the death of George Rizko opened at 10 a.m. to-day, concluding at 11.45 a.m. Witnesses called were Engineer Rutley and Conductor Knight of train 11 from which Rizko fell; L. V. Blanchard, Oliver Barringham and Reg. Hay, besides some friends of Rizko with whom he spent part of the evening. Refreshments, including beer, whiskey and rum were partaken of. Deceased's liquor permit showed the purchase of two bottles on July 27. Dr. K. McLean gave evidence on Rizko's injuries, which probably caused death immediately or very shortly after his fall.

Others present were E. C. Stuart, legal department C. P. R., Mr. Ennis of the Investigation branch, and Assistant Supt. G. M. Cordingley of Macleod.

No direct evidence was given of seeing Rizko board the train, neither was any evidence produced of his having purchased a ticket from Michel to Coleman, though he was sold a single ticket to return to Michel.

Bill Henderson of Lethbridge is spending a few weeks holiday here the guest of his grandparents, Mr. and Mrs. Wm. Fryde.

The Coleman Journal Office

IMPARTIAL AS LIGHT

YOU cannot argue with light. It just shows you things as they are. It plays no favorites. It gives brightness to the things that are already beautiful and it floods revealingly into the dark corners to show the dust and the grime and the hidden ugliness. If you guess at the nature and quality of things that are only half seen, if you see things that are not there, your eyes and your imagination are to blame. You cannot blame the light. For it can only illumine the aspects that are turned towards it.

NEWS is like light. It sheds a beam on men and events. It lifts the darkness from promotions and policies. It penetrates to hidden things and shows the truth as it is, for all to see.

THE news columns of a good newspaper are impartial. They tell the truth as it is found, they give all the facts that are known. The same news that guides its editorial opinions is there in full to inform your own judgments. It is the chiefest function of a reputable newspaper to bring everything of importance to the people into the daylight of publicity, discouraging vice and corruption and chicanery.

The independent newspapers of Southern Alberta shed the light of truth on the happenings and developments that interest you. Read them, confident in their integrity.
